CLEAR ORTHODONTIC ALIGNERS

# DENTIST BENEFITS

- 7 Day turn around time
- Marketing for your practice
- Interactive online platform
- Designated sales consultant

# HOW THE PROCESS WORKS

## CASE ENTRY:

### Step 1 - Panoramic X-ray

Easily upload a Panoramic X-ray using our Medicore Platform.

### Step 2 - Clinical prescription form

Medicore's compact Clinical Prescription form is used to convey special instructions the Orthodontist.

### Step 3 - Clinical photographs:

Easily upload your clinical photos using our Medicore platform.

### Step 4 - Digital Scan:

Upload the patients scan directly from your scanner. Our team offers on-site training and installation.

## MEDICORE PROCESS:

### Step 1 - Digitalisation:

A digital simulated treatment plan is sent to the dentist for approval before manufacturing starts.

### Step 2 - Manufacturing:

Manufacturing of Medicore Clear Aligners is done using high-tech 3D-Printing technology and registered dental technicians.

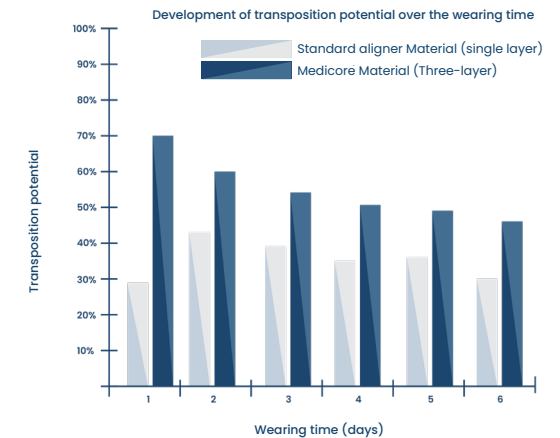

### Step 3 - Delivery:

Delivery is available country-wide!

# UNMATCHED QUALITY

## Material- Medicore Material

High quality material ensures thinner less invasive aligners. The three layer aligner material used maintains its rigidity throughout the treatment period.

## Tolerance - 25 micron 3D printing

Medicore uses state of the art 3D printers that produce dental models 30% more accurate than conventional methods.
